

ENRICH

Cellular Renewal Systems
ENRICH & protect your cellular function

- > **Reinforces** the Immune System
- > **Promotes** Antibody Response
- > **Protects** Cellular Function
- > **Supports** Key Immune Cells
- > **Delivers** Essential Vitamins & Minerals

ENRICH is the perfect marriage of compounds designed to protect cellular function and reinforce the immune system. This unique combination of Reishi mushroom, Bladderwrack algae and Goji fruit extract provides an organic, bioavailable source of powerful antioxidants, phytonutrients, polyphenols, minerals, and polysaccharides. **Cellular function and the immune system is further enriched by adding elemental zinc and essential vitamins C and D.**

Where possible, our ingredients have been selected and formulated to provide the highest levels of **bio-availability and absorption**.

Our ingredients and products are all manufactured to **Good Manufacturing Practice (GMP) standards**.

Our ingredients carry significant data to support their **quality, function and safety**.

Where possible, we have used natural ingredients that are harvested on a **sustainable and ethical basis**.

ENRICH is the perfect marriage of compounds designed to protect cellular function and reinforce the immune system.

Warning: As with all dietary supplements, it is recommended that you consult your physician if you are pregnant, nursing, under treatment for any illness or taking anticoagulants or other medication. Keep out of reach of children and pets. Do not use if Safety seal is broken.

Evaluation: These statements have not been evaluated by the Therapeutic Goods Administration (AU), Medsafe (NZ) or the Food & Drug Administration (USA). This product is not intended to diagnose, treat, cure, or prevent any disease.

ENRICH & protect your cellular function
Dietary Supplement • 90 Capsules

Suggested Use: Take 3 capsules daily.

Supplement Facts

Serving Size: 3 Capsules • Servings Per Container: 30

Amount Per Serving:	DV*
Goji Fruit Extract (<i>Lycium Barbarum</i>)	450mg
Reishi Mushroom (<i>Ganoderma Lucidum</i>)	336mg
Bladderwrack (<i>Fucus Vesiculosus</i>)	60mg
Vitamin D3 (<i>Cholecalciferol</i>)	9.9mg / 120%
Vitamin C (<i>Ascorbic Acid, Calcium Ascorbate</i>)	690mg / 690%
Zinc (<i>Zinc Citrate</i>)	15mg / 150%

*Daily Value

DISCLAIMER:

WARNING: As with all dietary supplements, it is recommended that you consult your physician if you are pregnant, nursing, under treatment for any illness or taking anticoagulants or other medication. Keep out of reach of children and pets. Do not use if safety seal is broken.

EVALUATION: These statements have not been evaluated by the Therapeutic Goods Administration (AU) and Medsafe (NZ). This product is not intended to diagnose, treat, cure, or prevent any disease.

W: www.mykiwigreen.com • E: nzau@mykiwigreen.com

SUGGESTED USE:

SERVING SIZE: One serving of ENRICH consists of 3x vegetable capsules. Recommended use for adults 18+ is to take 1 - 2 servings daily to ensure optimal efficacy.

TIMING: We recommend taking ENRICH 30 minutes before eating or 60 minutes after eating in order to maximise absorption and assimilation within the body.

CONSISTENCY: We recommend taking ENRICH at the same time each day if possible, this ensures that you are getting the most out of this product.

ENRICH & protect your cellular function

> *Ingredients:*

REISHI MUSHROOM (Ganoderma Lucidum)

This mushroom has a long 2000-year-old history in Chinese medicine and is considered the “Mushroom of Immortality”.

This unique mushroom extract contains 400 different biologically active constituents principally polysaccharides, triterpenoids, proteins, enzymes, steroids, sterols, nucleotides, fatty acids, vitamins and minerals. These bioactive components are linked to a broad spectrum of therapeutic interactions within the body, including increased antioxidant, antimicrobial, and anti-inflammatory function.

This mushroom has demonstrated a strong capacity to **enrich immune function** in various peer reviewed studies. This is exhibited in the mushrooms ability to increase circulating white blood cells (natural killer cells) and accelerate viral defence via increased lymphocyte production.

BLADDERWRACK (Fucus Vesiculosus)

Bladderwrack is an organic fucoidan sourced from wild Fucus Vesiculosus seaweed. Bladderwrack commonly known for its **pro-thyroid effects** contains more bioavailable iodine than any other organic material on the planet.

This high-purity fucoidan extract delivers a **nutrient dense combination of over 8 essential minerals**, including: zinc, magnesium, potassium and calcium.

Bladderwrack is rich in antioxidant phlorotannins, fucoxanthins and various polyphenols with multiple phenolic groups. These bioactive components have demonstrated in various peer reviewed studies an array of health benefits which include: anti-cancer, anti-microbial, anti-diabetic, anti-inflammatory and the ability to protect DNA from photo-oxidative stress caused by UV radiation.

Bladderwrack positively **modulates immune function** via increased production of cytotoxic T cells, natural killer cells, and increasing the phagocytic activity of monocytes and granulocytes.

“Grown in the pristine ocean waters of Nova Scotia and Brittany, where it is harvested by hand on an environmentally sustainable basis”.

Where possible, our ingredients have been selected and formulated to provide the highest levels of **bio-availability and absorption**.

Our ingredients and products are all manufactured to **Good Manufacturing Practice (GMP) standards**.

Our ingredients carry significant data to support their **quality, function and safety**.

Where possible, we have used natural ingredients that are harvested on a **sustainable and ethical basis**.

GOJI FRUIT (Lycium Barbarum)

Lycium Barbarum is a shrub native to China. This unique shrub fruits berries commonly referred to as Goji fruit. Goji fruit has been an important part of traditional Chinese medicine for more than 2000 years due to its rich chemical composition and medicinal properties.

Goji is classified as a super fruit for good reason, containing many nutrients with **high biological activity**, such as polysaccharide complexes, phenylpropanoids, carotenoids along with high Vitamin A & C content.

Research on Goji fruit is well established and has exhibited **positive modulation of the immune system** in various clinical trials. Research has also indicated that the compounds found in Goji fruit have proapoptotic and antiproliferative activity against cancer.

Goji fruit **supports the immune system** by reducing oxidative stress and HDL levels. Goji fruit's antioxidant function prevents free radicals from damaging DNA, lipids, and proteins.

VITAMIN C (Ascorbic Acid, Calcium Ascorbate)

Vitamin C is an essential nutrient **crucial for immune function**, cardio-vascular health, and the regeneration of cells. Vitamin C is required for the biosynthesis of collagen and various neurotransmitters that regulate brain function.

Vitamin C is involved in protein metabolism and plays a vital role in the **repair of tissue and wounds**. Vitamin C has been extensively researched and scientifically proven to limit the damaging effects of free radicals via its **antioxidant function** within the body.

VITAMIN D3 (Cholecalciferol)

Vitamin D is a **critical and essential micronutrient** for human health. Vitamin D plays a crucial role in a broad spectrum of biological actions due to the abundance of these receptors within the body.

Vitamin D is involved in regulating minerals like calcium, phosphorus, sodium and magnesium. Vitamin D also has both anti-inflammatory and immunoregulatory properties; vital for **optimal immune function**.

Vitamin D **enriches the immune system** in a number of ways, this includes: increasing T cells and macrophage activity, inhibition of cellular proliferation and inducing terminal differentiation. Vitamin D also demonstrates the capacity to improve angiogenic behaviour, support apoptosis and protect respiratory function.

ZINC (Zinc Citrate)

Zinc is an essential trace mineral needed for the healthy growth and maintenance of the human body. Zinc is involved in numerous aspects of **cellular regeneration** and cellular metabolism.

Zinc is vital to create new cells, particularly collagen and fiber-like tissues; which is a necessary function in **repairing damaged cells**.

Zinc supports **optimal immune function** in a number of ways by promoting cellular regeneration, increasing T cell production and supporting the correct synthesis of DNA.

Various clinical trials have demonstrated that zinc has a high capacity to **protect the body** from microbes and viral infection. Zinc is able to block the pathways these bacterial and viral pathogens use to take in nutrients, further **accelerating a healthy immune response**.
