

APPLICATION & USE...

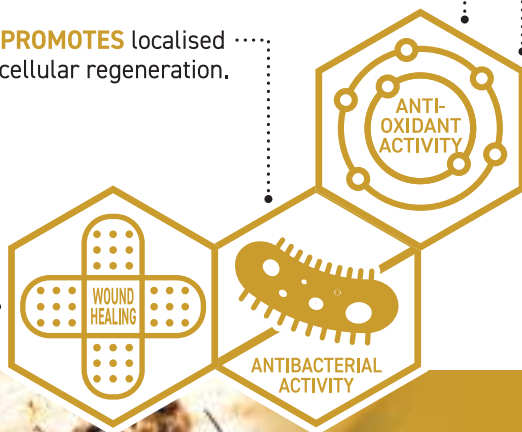

> **REVITALISES**, nourishes and rejuvenates the skin.

> **REFRESHING** & cooling mist.

> **ANTI-AGING** & regenerative properties.

> **ANTIMICROBIAL** & antibacterial treatment for wounds, injury and burn recovery.

> **PROMOTES** localised cellular regeneration.

My Kiwi Green is a New Zealand owned & operated biotech company, providing natural based products that support longevity and the cellular renewal process.

ENRICH is the perfect marriage of compounds designed to protect cellular function and reinforce the immune system.

CLEANSE is a unique combination of fast acting natural extracts tasked with protecting, supporting and optimising your circulatory system.

RENEW is a micro-nutrient dense combination of plant botanicals tasked with supporting cellular renewal and the release of adult stem cells.

MANUKA HONEY SPRAY

NATURAL CELLULAR REGENERATION

for Health & Beauty

WHY MANUKA HONEY?

Honey has a long history of use as a medicine since ancient civilization for a wide range of disease conditions.

Manuka Honey has been revered by both the indigenous Maori of New Zealand and the international community due to its regenerative properties, anti-microbial content, and wound healing capability.

HOW?

ROYAL JELLY PROTEINS from Manuka Honey are gently recovered and isolated using a novel patent protected method.

THIS NOVEL TREATMENT utilizes Photo-Fenton chemistry (oxidization process) to recover over 1 billion particles per mil (RJP, antioxidants, minerals).

WHY ISOLATE ROYAL JELLY PROTEINS?

Royal Jelly proteins contain high levels of hydroxyl radicals. Hydroxyl radicals turn CO₂ back into water, which is the fundamental energy system used in physics to initiate cellular death and regeneration (Apoptosis).

WHY?

OVER 50-70 BILLION CELLS undergo a natural recycling process called Apoptosis every day.

THIS PROCESS STIMULATES REGENERATION & REPAIR of the body by initiating the breakdown of dysfunctional cellular material.

THE ENERGY REQUIRED to turn cells back into CO₂ and water (Apoptosis) comes from Photo-Fenton Chemistry (oxidization process) and the production of hydroxyl radicals.

KEY BENEFITS...

- **HIGH IN ANTIOXIDANTS** providing skin protection & maintenance
- **ANTI-INFLAMMATORY** and wound healing capabilities
- **PROMOTES** regeneration of healthy and vibrant skin
- **ALL NATURAL**, non-toxic, hypo-allergenic

My Kiwi Green's **MANUKA HONEY SPRAY** is designed to accelerate and support the cellular regeneration process within the body. This product has been developed using a complex novel, patent protected scientific process, unleashing the natural regenerative power of New Zealand's unique Manuka Honey.

➤ Our Skin Is The Largest Organ In The Human Body

Our skin plays an important role in protecting us from outside elements. It also serves as a barrier for things like bacteria to enter our body.

➤ Health & Confidence

Good skincare is linked to overall better health both physical and mental. When our skin looks and feels youthful, we feel better about ourselves and have more self confidence.

➤ Prevention Is Easier Than Correction

Preventing skin problems is easier and much less costly than trying to fix them in the future.

➤ Maintain Youth & Beauty

As we age, our skin cell's ability to regenerate slows down, making our skin look duller and less radiant. Having a high quality skin care regime supports the growth of new skin cells resulting in vibrant, radiant skin.

"Healthy skin is a reflection of our overall wellness"
